NetServices Plc Achieves Premier Certification from Cisco in the UK

Manchester, UK – 5th August 2009 – NetServices Plc announced today it has achieved Premier Certification from Cisco[®]. To earn Premier Certification, NetServices had to meet standards for networking competency, service, support and customer satisfaction set forth by Cisco.

Mark Vickers, CEO of NetServices Plc commented that “we are committed to continually enhancing our internal skills set for managing end to end solutions. The premier certification confirms we are achieving this goal and opens up further opportunities for us within the Cisco MSCP Program”.

“Cisco is committed to providing tools, training and programs to help drive partner growth, differentiation and profitability,” said Surinder Brar, senior director of worldwide channels at Cisco. “With a Premier Certification, SMB Specialisation, and participation in the Cisco Managed Services Channel Program, NetServices Plc has made an investment in delivering the integrated and customised technology solutions today’s customers demand.”

As a Cisco Premier Certified Partner NetServices demonstrates a range of technical expertise. To achieve Cisco Premier Certification NetServices was required to achieve the Cisco Express Foundation Specialisation. This specialisation includes tests on technical competency in the integration of basic routing and switching, wireless LANs, and security technologies. In addition, NetServices was required to integrate a base level of Cisco Lifecycle Services into their offerings and demonstrate measurably high levels

of customer satisfaction based on independently audited customer satisfaction surveys.

In addition, NetServices' participation in the [Cisco Managed Services Channel Program](#) indicates that its Cisco Powered services have undergone a rigorous third-party assessment and have met requirements based on the Information Technology Infrastructure Library® (ITIL) framework of best practices and market and industry requirements

About NetServices Plc

www.netservicesplc.com

NetServices Plc is a Manchester based, innovative Managed Services provider, specialising in providing services based around comprehensive networking solutions.

NetServices holds a unique position in the UK network service provision market, owning its own network infrastructure and managing its [own data centre](#), which connects into its nationwide Quality of Service (QoS) enabled core network. All solutions are provisioned to include our dedicated operational support as standard.
